TECHNICAL SKILLS

React

MySQL

Web Development

Python Programming

Java Programming

Node JS

GitHub

Vibe Coding

PROJECTS

Media Streaming Application (IBM Cloud)

Created a media streaming application utilizing IBM Cloud bucket storage for efficient content delivery and management.

Multi Sharing Application

Developed a standalone application enabling simultaneous file sharing among multiple users without requiring an internet connection.

Candor Data Platform

CDP is a IDE which uses the VS Fork application focused on ETL process using the Coding Agent, where the user is just need to mention the prompt and the AI will take on the remaining process.

Predetection of Application level Traffic using TCP Communications

Uses the Wireshark to capture and use the python programming to analyze the anomaly in the traffic and block the IP of the particular address in the firewall settings to prevent any other further

DOS or IP Flooding attacks.
